## DETAILED ACTION

### *Election/Restriction*

1. Claims 2-10 and 12-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No.6 and 8.

### *Drawings*

2. Figures 33 and 34 are objected to as they should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Claim Objections*

3. Claim 20 is objected to because of the following informalities:

The term of "to any one of claims 11-13" should read as --to claim 11--, as claims 12 and 13 are not identified as readable on the species elected by Applicant in Paper No. 8.

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Honma et al. ("Honma"; JP 53-116089, 10/11/1978; of record).

Honma discloses a wiring (Fig. 2, and see the English Abstract), comprising a Cu layer (24) surrounded by a coating film made of Ti (25).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 11 and 20, insofar as being supported by Applicant's elected species, are rejected under 35 U.S.C. 103(a) as being unpatentable over Wakai et al. ("Wakai"; 5,166,085) in view of Honma et al. ("Honma"; JP 53-116089, 10/11/1978; of record).

Wakai discloses a TFT substrate (Figs. 3-6; also see col. 5, lines 36-38), comprising a wiring formed of a Cu layer (102).

Although Wakai does not expressly disclose that the wiring can have a Ti coating film surrounding the Cu layer, Honma, whose disclosure is discussed as applied to claim 1 above, teaches (Fig. 2) to form a wiring comprising a Cu layer (24) surrounded by a coating film made of Ti (25) for improving the adhesion around the Cu layer (see the English abstract).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the Ti-coating of Honma into the wiring of Wakai, so that a TFT substrate with improved adhesion around the wiring would be achieved.

Regarding claim 20, the LCD of Wakai (see Fig. 5) comprises a TFT substrate (112) in a pair of opposing substrates (112 and 116).

### ***Conclusion***

8. Papers related to this application may be submitted to Technology center (TC) 2800 by facsimile transmission. Papers should be faxed to TC 2800 via the TC 2800 Fax center located in Crystal Plaza 4, room 4-C23. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The Group 2811 Fax Center number is (703) 308-7722 or 308-7724. The Group 2811 Fax Center is to be used only for papers related to Group 2811 applications.
